Strainer

Type FIA 15-200, 52 bar (754 psi)

FIA strainers are a range of angleway and straightway strainers, which are carefully designed to give favourable flow conditions. The design makes the strainer easy to install, and ensures quick strainer inspection and cleaning.

FIA strainers are used ahead of automatic controls, pumps, compressors etc., for initial plant start-up and where permanent filtration of the refrigerant is required. The strainer reduces the risk of undesirable system breakdowns and reduces wear and tear on plant components.

FIA strainers are equipped with a screen mesh of stainless steel, available in sizes 100, 150, 250 and 500 μ (microns*), (US 150, 100, 72, 38 mesh*).

* Mesh is the number of threads per inch.
 μ (microns) is the distance between two threads
(1 μ = 1/1000 mm).

Features

- Applicable to HCFC, HFC, R717 (Ammonia), R744 (CO₂) and all flammable refrigerants.
- Modular Concept:
 - Each valve housing is available with several different connection types and sizes.
 - Possible to convert FIA strainers to any other product in the Flexline™ SVL family (shut-off valve, hand operated regulating valve, check & stop valve or check valve) just by replacing the complete top part.
- Fast and easy overhaul service. It is easy to replace the top part and no welding is needed
- Filter net of stainless steel mounted direct without extra gaskets means easy servicing
- Two types of strainer inserts are available:
 - A plain insert of stainless steel.
 - A pleated insert (DN 15-200) with extra large surface, which ensures long intervals between cleaning and low pressure drop.
- FIA 15 – 40 (1/2 – 1 1/2 in):
A special insert (50 μ) can be used in combination with a standard version when cleaning a plant during commissioning.
- FIA 50 – 200 (2 – 8 in):
A large capacity filter bag (50 μ) can be inserted for cleaning plant during commissioning.
- FIA 80-200 (3 – 8 in) can be equipped with a magnetic insert for detention of iron particles and other magnetic particles.
- Each strainer clearly marked with type, size and performance range
- Housing and bonnet of low temperature steel in accordance with the requirements of the Pressure Equipment Directive and those of other international classification authorities
- Temperature range:
-60 – 150 °C / -76 – 302 °F
- Max. working pressure:
52 bar g / 754 psi g
- Classification: DNV, CRN, BV, EAC etc.
To get an updated list of certification on the products please contact your local Danfoss Sales Company

Strainer, type FIA 15-200, 52 bar (754 psi)

Design

Connections

Available with the following connections:

- Butt-weld DIN (EN 10220)
DN 15 – 200 (1/2 – 8 in)
- Butt-weld ANSI (B 36.10 Schedule 80),
DN 15 – 40 (1/2 – 1 1/2 in)
- Butt-weld ANSI (B 36.10 Schedule 40),
DN 50 – 200 (2 – 8 in)
- Butt-weld GOST (8734-75 and 8732-78),
DN 15 – 150 (1/2 – 6 in)
- Socket Weld (ANSI B 16.11),
DN 15 – 50 (1/2 – 2 in)

- FPT Female Pipe Thread, NPT
(ANSI/ASME B 1.20.1),
DN 15 – 32 (1/2 – 1 1/4 in)

Strainer Insert

A filter grid and filter net of stainless steel ensure long element life. The filter net offers a very high degree of cleanability.

Housing

The strainer housing is made of special, cold resistant steel.

Pressure Equipment Directive (PED)

FIA strainers are approved in accordance with the European standard specified in the Pressure Equipment Directive and are CE marked.
For further details / restrictions - see Installation Instruction

Nominal bore	DN ≤ 25 (1 in)	DN 32 – 80 mm (1 1/4 – 3 in)	DN 100 – 200 mm (4 – 8 in)
Classified for	Fluid group I		
Category	Article 3, paragraph 3	II	III

Installation / Maintenance

The strainer is designed to resist high internal pressures. However, the piping system in general should be designed to avoid liquid traps and reduce the risk of hydraulic pressure caused by thermal expansion.

(0.7 psi) in the suction line. The max. permissible differential pressure is 1 bar (15 psi).

For further information refer to installation instruction for FIA.

Install the strainer with the cover in downward position.

Danfoss recommends replacement / cleaning of the strainer when the differential pressure loss >0.5 bar (7.3 psi) in the liquid line and >0.05 bar

Identification:

Example of marking ring, FIA

Technical data

- **Refrigerants**
Applicable to HCFC, HFC, R717 (Ammonia), R744 (CO₂) and all flammable refrigerants.
- **Temperature range**
-60 – 150 °C / -76 °F – 302 °F.
- **Max. working pressure:**
52 bar g / 754 psi g.

Strainer, type FIA 15-200, 52 bar (754 psi)

Selection of strainer size

The mesh aperture size of the strainer must satisfy the requirements stated by the suppliers of the equipment to be protected.

The following recommendations of aperture size apply in general to refrigeration installations:

All lines

First start up: **50μ**

(Use strainer insert with removable insert for FIA DN15-40 or separate filter bag for FIA DN 50-200. 50μ insert should normally be removed after the first 24 hours of operation)

Liquid Lines

Ahead of pumps: **500μ** [38 mesh]
 After pumps: **150μ** [100 mesh] / 250μ [72 mesh]
 In front of AKVA valves **100μ** [150 mesh]

Protection of automatic regulation equipment

Generally **150μ** [100 mesh] / 250μ [72 mesh]
 Sensitive equipment, e.g. suction regulators with low temperature **250μ** [72 mesh]

Definition

Mesh is the number of threads per inch. μ (microns) is the distance between two threads (1μ = 1 /1000 mm).

Suction Lines

Ahead of screw compressor **250μ** [72 mesh]
 Ahead of piston compressor **150μ** [100 mesh]

Strainer, type FIA 15-200, 52 bar (754 psi)

Ordering

The table below is used to identify the strainer required. Please note that you have to order **FIA strainer without insert, a strainer insert and accessories.**

Example:

FIA 50 D ANG + FIA-X 50 150 μ Strainer insert + Filter Bag = **148H5912 + 148H3130 + 148H3150**

Size		Type	FIA Without strainer insert
mm	in.

Strainer

Type FIA 250-300, 52 bar (754 psi)

FIA 250-300 (10-12 in.) strainers are a range of angleway strainers, which are carefully designed to give favourable flow conditions. The design makes the strainer easy to install, and ensures quick strainer inspection and cleaning.

FIA strainers are used ahead of automatic controls, pumps, compressors etc., for initial plant start-up and where permanent filtration of the refrigerant is required. The strainer reduces the risk of undesirable system breakdowns and reduces wear and tear on plant components.

FIA 250-300 (10-12 in.) strainers are equipped with a screen mesh of stainless steel, available in sizes 150 and 250 (microns*), (US 100 and 72 mesh*).

* Mesh is the number of threads per inch.
 μ (microns) is the distance between two threads
 (1 μ = 1 /1000 mm).

Features

- Applicable to HC, HCFC, HFC, R717 (Ammonia) and R744 (CO₂)
- Available with DIN and ANSI connections.
- Filter net of stainless steel mounted direct. without extra gaskets means easy servicing.
- FIA 250-300 (10-12 in.) can be equipped with a magnetic insert for detention of iron particles and other magnetic particles.
- Each strainer clearly marked with type, size and performance range.
- Housing and bonnet of low temperature steel in accordance with the requirements of the Pressure Equipment Directive and those of other international classification authorities.
- Temperature range: -60/+150°C (-76/+302°F)
- Max. working pressure: 40 bar g (580 psi g)
- Classification: DNV, CRN, BV, EAC etc. To get an updated list of certification on the products please contact your local Danfoss Sales Company.

Strainer, type FIA 250-300, 52 bar (754 psi)

Design

Connections

Available with the following connections:

- Butt-weld DIN (EN 10220)
DN 250 - 300 (10-12 in.)
- Butt-weld ANSI (B 36.10 Schedule 40),
DN 250 - 300 (10-12 in.)

Housing

The strainer housing is made of special, cold resistant steel.

Strainer Insert

A filter grid and filter net of stainless steel ensure long element life. The filter net offers a very high degree of cleanability.

Pressure Equipment Directive (PED)

FIA strainers are approved in accordance with the European standard specified in the Pressure Equipment Directive and are CE marked. For further details / restrictions - see Installation Instruction

Nominal bore	DN 250 mm (10 in.)	DN 300 (12 in.)
Classified for	Fluid group I	
Category	III	IV

Installation/Maintenance

The strainer is designed to resist high internal pressures. However, the piping system in general should be designed to avoid liquid traps and reduce the risk of hydraulic pressure caused by thermal expansion.

(0.7 psi) in the suction line. The max. permissible differential pressure is 1 bar (15 psi).

For further information refer to installation instruction for FIA.

Install the strainer with the cover in downward position.

Danfoss recommends replacement/cleaning of the strainer when the differential pressure loss >0.5 bar (7.3 psi) in the liquid line and >0.05 bar

Identification:

Example of marking ring, FIA

Strainer, type FIA 250-300, 52 bar (754 psi)

Technical data

- **Refrigerants**
Applicable to HC, HCFC, HFC, R717 (Ammonia) and R744 (CO₂)
- **Temperature range**
-60/+150°C (-76/+302°F)
- **Pressure range**
40 bar g (580 psi g) at -60°C to +60°C (-76°F to +140°F)
36 bar g (522 psi g) at +60°C to +80°C (+140°F to +176°F)
32 bar g (464 psi g) at +80°C to +120°C (+176°F to +248°F)
28 bar g (406 psi g) at +120°C to +150°C (+248°F to +302°F)

Selection of strainer size

The mesh aperture size of the strainer must satisfy the requirements stated by the suppliers of the equipment to be protected.

The following recommendations of aperture size apply in general to refrigeration installations:

Liquid Lines

After pumps: **150**μ [100 mesh] / 250μ [72 mesh]
In front of AKVA valves **100**μ [150 mesh]

Protection of automatic regulation equipment

Generally **150**μ [100 mesh] / 250μ [72 mesh]
Sensitive equipment, e.g. suction regulators with low temperature **250**μ [72 mesh]

Suction Lines

Ahead of screw compressor **250**μ [72 mesh]
Ahead of piston compressor **150**μ [100 mesh]

Definition

Mesh is the number of threads per inch. μ (microns) is the distance between two threads (1μ = 1/1000 mm).

Strainer

Type FIA 15-200, 65 bar (943 psi)

FIA strainers are a range of angleway and straightway strainers, which are carefully designed to give favourable flow conditions. The design makes the strainer easy to install, and ensures quick strainer inspection and cleaning.

FIA strainers are used ahead of automatic controls, pumps, compressors etc., for initial plant start-up and where permanent filtration of the refrigerant is required. The strainer reduces the risk of undesirable system breakdowns and reduces wear and tear on plant components.

FIA strainers are equipped with a screen mesh of stainless steel, available in sizes 100, 150, 250 and 500 μ (microns*), (US 150, 100, 72, 38 mesh*).

* Mesh is the number of threads per inch.
 μ (microns) is the distance between two threads
(1 μ = 1 /1000 mm).

Features

- Modular Concept:
 - Each valve housing is available with DIN and ANSI butt weld connection and in several different sizes.
 - Possible to convert FIA strainers to any other product in the SVL family (Shut-off valve, regulating valve, check & stop valve or check valve) just by replacing the complete top part.
- Fast and easy overhaul service. It is easy to replace the top part and no welding is needed.
- Filter net of stainless steel mounted direct without extra gaskets means easy servicing.
- Two types of strainer inserts are available:
 - A plain insert of stainless steel.
 - A pleated insert (DN 15-200) with extra large surface, which ensures long intervals between cleaning and low pressure drop.
- FIA 15-40 (½ – 1 ½ in.):
A special insert (50 μ) can be used in combination with a standard version when cleaning a plant during commissioning.
- FIA 50-200 (2 - 8 in.):
A large capacity filter bag (50 μ) can be inserted for cleaning plant during commissioning.
- FIA 65-200 (2½ - 8 in.) can be equipped with a magnetic insert for detention of iron particles and other magnetic particles.
- Each strainer clearly marked with type, size and performance range
- Housing and bonnet of low temperature steel in accordance with the requirements of the Pressure Equipment Directive and those of other international classification authorities
- Classification: DNV, CRN, BV, EAC etc.
To get an updated list of certification on the products please contact your local Danfoss Sales Company.
- Equipped with 42CrMo5 bolts to withstand high pressure.

Strainer, type FIA 15-200, 65 bar (943 psi)

Technical data

- **Refrigerants**
Applicable to HCFC, HFC, R717 (Ammonia), R744 (CO₂) and flammable refrigerants.
For further information refer to the product instruction for FIA.
- **Temperature range**
-60/+150°C (-76/+302°F).
- **Max. working pressure**
65 bar (943 psig)

Design

Strainer Insert

A filter grid and filter net of stainless steel ensure long element life. The filter net offers a very high degree of cleanability.

Housing

The strainer housing is made of special, cold resistant steel.

Installation/Maintenance

The strainer is designed to resist high internal pressures. However, the piping system in general should be designed to avoid liquid traps and reduce the risk of hydraulic pressure caused by thermal expansion.

Install the strainer with the cover in downward position.

Danfoss recommends replacement/cleaning of the strainer when the differential pressure loss >0.5 bar (7.3 psi) in the liquid line and >0.05 bar (0.7 psi) in the suction line. The max. permissible differential pressure is 1 bar (15 psi).

For further information refer to installation instruction for FIA.

Example of marking ring, FIA

Pressure Equipment Directive (PED)

SVL valves are approved according to the European standard specified in the Pressure Equipment Directive and are CE marked.

For further details / restrictions - see Installation guide.

SVL			
Nominal bore	DN ≤ 25 mm (1 in.)	DN 32-80 mm (1¼ - 3 in.)	DN 100 - 200 mm (4-8 in.)
Classified for	Fluid group I		
Category	Article 3, paragraph 3	II	III

Strainer, type FIA 15-200, 65 bar (943 psi)

Selection of strainer size

The mesh aperture size of the strainer must satisfy the requirements stated by the suppliers of the equipment to be protected.

The following recommendations of aperture size apply in general to refrigeration installations:

All lines

First start up: **50μ**

(Use strainer element with removable insert for FIA DN15-40 or separate filter bag for FIA DN 50-200. 50μ insert should normally be removed after the first 24 hours of operation)

Liquid Lines

Ahead of pumps: **500μ** [38 mesh]
 After pumps: **150μ** [100 mesh] / 250μ [72 mesh]
 In front of AKVA valves **100μ** [150 mesh]

Protection of automatic regulation equipment

Generally **150μ** [100 mesh] / 250μ [72 mesh]
 Sensitive equipment, e.g. suction regulators with low temperature **250μ** [72 mesh]

Definition

Mesh is the number of threads per inch. μ (microns) is the distance between two threads (1μ = 1/1000 mm).

Suction Lines

Ahead of screw compressor **250μ** [72 mesh]
 Ahead of piston compressor **150μ** [100 mesh]

Strainers in stainless steel

Type FIA SS

In certain specific areas such as outdoor applications and corrosive atmospheres, such as coastal installations, there is a need for high surface protection to prevent failure due to corrosion.

Today's food safety standards often call for daily treatment with detergents to protect against bacteria growth, again producing a need for high surface protection.

FIA SS strainers are a range of angle-way and straight-way strainers which are carefully designed to give favourable flow conditions.

The design makes the strainer easy to install, and ensures quick strainer inspection and cleaning.

FIA SS strainers are used ahead of automatic controls, pumps, compressors etc., for initial plant start-up and where permanent filtration of the refrigerant is required. The strainer reduces the risk of undesirable system breakdowns and reduces wear and tear on plant components.

Features

- Applicable to HCFC, HFC, R717 (Ammonia), R744 (CO₂) and all flammable refrigerants.
- Designed to give favourable flow conditions.
- Housing is made of special cold resistant stainless steel approved for low temperature operations.
- Easy to disassemble for inspection and service.
- Butt-weld DIN and ANSI connections.
- Max. operating pressure: 52 bar g (754 psig)
- Temperature range: -60/+150°C (-76 +302°F).
- Compact and light valves for easy handling and installation.
- Classification: DNV, CRN, BV, EAC etc. To get an updated list of certification on the products please contact your local Danfoss Sales Company.

Pressure and temperature range

— FIA SS DN15-DN65

Strainers in stainless steel, type FIA SS

Design

Connections

Available with the following connections:

- Butt-weld DIN (EN 10220)
DN 15 - 65 (½ - 2½ in.)
- Butt-weld ANSI (B 36.19M)
DN 15 - 65 (½ - 2½ in.)

Strainer Insert

A filter grid and filter net of stainless steel ensure long element life. The filter net offers a very high degree of cleanability.

Housing

Made of stainless steel approved for low temperature operations.

Pressure Equipment Directive (PED)

FIA SS strainers are approved in accordance with the European standard specified in the Pressure Equipment Directive and are CE marked. For further details / restrictions - see Installation Instruction.

Installation/Maintenance

The strainer is designed to resist high internal pressures. However, the piping system in general should be designed to avoid liquid traps and reduce the risk of hydraulic pressure caused by thermal expansion.

Install the strainer with the cover in downward position.

Danfoss recommends replacement/cleaning of the strainer when the differential pressure loss >0.5 bar (7.3 psi) in the liquid line and >0.05 bar (0.7 psi) in the suction line. The max. permissible differential pressure is 1 bar (15 psi).

For further information refer to installation instruction for FIA SS.

Identification:

Example of marking ring, FIA SS

FIA SS		
Nominal bore	DN ≤ 25 (1 in.)	DN 32-65 mm (1¼ - 2½ in.)

Strainers in stainless steel, type FIA SS

Selection of strainer size

The mesh aperture size of the strainer must satisfy the requirements stated by the suppliers of the equipment to be protected.

The following recommendations of aperture size apply in general to refrigeration installations:

All lines

First start up: **50μ**

(Use filter element with removable insert for FIA SS DN15-40 or separate filter bag for FIA SS DN 50-65. 50μ insert should normally be removed after the first 24 hours of operation)

Liquid Lines

Ahead of pumps: **500μ** [38 mesh]
 After pumps: **150μ** [100 mesh] / 250μ [72 mesh]
 In front of AKVA valves **100μ** [150 mesh]

Protection of automatic regulation equipment

Generally **150μ** [100 mesh] / 250μ [72 mesh]
 Sensitive equipment, e.g. suction regulators with low temperature **250μ** [72 mesh]

Suction Lines

Ahead of screw compressor **250μ** [72 mesh]
 Ahead of piston compressor **150μ** [100 mesh]

Definition

Mesh is the number of threads per inch. μ (microns) is the distance between two threads (1μ = 1 /1000 mm).

Strainers

type FA

Strainer type FA with interchangeable filter insert is used in lines carrying fluorinated refrigerants, ammonia, water, brine, oil, and gas.

Features

- Retains contaminants, e.g. slag, and weld beads and swarf.
- Pressure drop insignificant
- Classification: DNV, CRN, BV, EAC etc. To get an updated list of certification on the products please contact your local Danfoss Sales Company.

Technical data

- *Temperature of media*
-50 – 140 °C
- *Max. working pressure*
PS = 28 bar
- *Max. test pressure*
p' = 42 bar
- *Filter insert*
Stainless steel weave, mesh size 150µ (100 mesh)

Materials

- Gaskets are non asbestos
- Valve housing made of GGG - 40.3

ELIMINATOR® filter drier with replaceable solid core

Type DCR

Danfoss ELIMINATOR® filter driers with replaceable solid core, type DCR, are for use in liquid and / or suction lines in refrigeration, freezing and air-conditioning systems.

Besides being able to meet the demanding requirements of high working pressure levels when operating with R410A thanks to replaceable solid cores the DCR programme offers flexibility with respect to different applications.

Available with steel and copper connections.

Features

DCR housing:

- PED approved for PS up to 46 bar
- DCR housing (incl. core holder) are made entirely of steel and are thus compatible with all refrigerants
- DCR housings have undergone phosphate pre-treatment and have a corrosion-resistant powder-paint finish
- DCR housings are helium leak tested

Top covers for DCR housings:

- Zinc-chromated steel top covers with or without external access connection

Inserts for DCR housings - strainer

48 - F strainer - compatible with all refrigerants:

- Retains dirt particles larger than 15 µm
- For use direct in DCR housings
- Utilised in the suction or liquid line

Inserts for DCR housings - solid cores

48 - DM - 100% molecular sieve solid core suitable for HFC (R134a, R404A, R507, R407C and R410A) refrigerants:

- Provides high moisture adsorption at low and high condensing temperatures
- Effective protection against impurities

48 - DC - 80% molecular sieve and 20% activated alumina solid core suitable for HCFC (R22) refrigerants and compatible with HFC (R134a, R404A, R507, R407C and R410A) refrigerants:

- Adsorbs moisture and acid in the system throughout the entire temperature range

48 - DA - 30% molecular sieve and 70% activated alumina solid core suitable after compressor burnout and compatible with HCFC (R22) / HFC (R134a, R404A, R507, R407C and R410A) refrigerants:

- High acid adsorption and standard water adsorption

All solid cores have an optimised uniform grain size ensuring effective dirt removal and low pressure drop. The robust solid cores withstand pressure surge and vibration.

ELIMINATOR® filter drier with replaceable solid core, type DCR

Approvals

CE marked in accordance with the European Pressure Equipment Directive - 97/23/EC

UL US listed 207 and C22.2 no. 140.3
EN 12284

Introduction

Danfoss ELIMINATOR® filter driers with replaceable solid core, type DCR, protect refrigeration, freezing and air-conditioning systems from moisture, acids, and solid particles.

With these contaminants eliminated, systems are safer from harmful chemical reactions and from abrasive impurities.

¹⁾ Drying capacity is based on following moisture content test standards before and after drying:

- R134a: 1050 – 50 ppm W
- R404A, R507: 1020 – 50 ppm W
- R407C: 1020 – 50 ppm W
- R410A: 1050 – 50 ppm W
- R22: 1050 – 60 ppm

In accordance with ARI 710-2004

²⁾ Given in accordance with ARI 710-2004 for:

- t_e = -15 °C
- t_e = 30 °C
- Δp = 0.07 bar

³⁾ For usage with strainer or as a receiver application

⁴⁾ For "drier" application using all the permissible cores

Refrigerants other than specified in the table please contact Danfoss for the approval.

ELIMINATOR® filter drier with replaceable solid core, type DCR
Capacity (continued)
Drying and acid capacity, type 48-DA

Type	Number of cores	Drying capacity [g of water] ¹⁾												Acid capacity ²⁾ [g]
		Evaporating temperature t _e [°C]												
		-40	-20	4.4	-30	-20	4.4	-40	-20	4.4	-40	-20	4.4	
		R22 / R407C			R134a			R404A / R507			R410A

The data given apply to DCR 04811 with 48-F core

Liquid capacity is given in accordance with ARI 710-2004 for:

- t_e = -15 °C
- t_c = 30 °C
- Δp = 0.07 bar

ELIMINATOR® filter drier with replaceable solid core, type DCR

Type of connector and recommended soldering material

	Copper ODF solder connector Copper pipe
	Steel ODF solder connector Copper pipe
	Steel butt weld connector Steel pipe

Solder connector	Recommended soldering material
Copper	Min. 5% Ag
Steel	Silver-flo 55 + Easy-flow flux

Ordering

DCR housing and insert are ordered separately. Select housing and top cover with all internal

parts assembled from table 1 or 2 and required number of inserts from table 3.

¹⁾ Not for usage with DCR 048 – 192 housings

Core surface

DM 048, DC 048 and DA 048 = 612 cm²
 DM 096, DC 096 and DA 096 = 1225 cm²
 DM 144, DC 144 and DA 144 = 1837 cm²
 DM 192, DC 192 and DA 192 = 2450 cm²
 48-F = 405 cm²

Core volume

DM 048, DC 048 and DA 048 = 727 cm³
 DM 096, DC 096 and DA 096 = 1454 cm³
 DM 144, DC 144 and DA 144 = 2181 cm³
 DM 192, DC 192 and DA 192 = 2908 cm³

ELIMINATOR® filter drier with replaceable solid core, type DCR

Core selection

Refrigerant and oil types		DC	DM	DA
Refrigerant	HFC (R134a, R404A, R507, R407C and R410A)	Recommended	Recommended	Recommended
	HFO (R1234ze, R407F, R407A)	Recommended	Recommended	Recommended
	HFCF (R22)	Recommended	Recommended	Recommended
Oil	Mineral or AB	Recommended	Recommended	Recommended
	POE or PAG, pure	Recommended	Recommended	Recommended
	POE or PAG, with additives	Not recommended ¹⁾	Recommended	Recommended

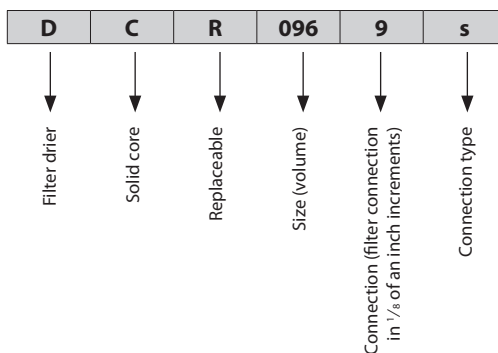

¹⁾ DC filter driers cores contain activated alumina, which is a polar material used for acid adsorption. Many oil additives are also polar substances and can be adsorbed by the activated alumina, rendering them useless, and reducing the drier's acid capacity, though this is not harmful to the system.

Identification

Type codes

Type	Code	Description
Filter drier	D	Drier
Solid core	C	Solid core
	R	Replaceable
Size (volume)	048	48 in ³
	096	96 in ³
	144	144 in ³
	192	192 in ³
Connection (filter connection in 1/8 of an inch increments)	5	5/8 in. / 16 mm
	7	7/8 in. / 22 mm
	9	1 1/8 in. / 28 mm
	11	1 3/8 in. / 35 mm
	13	1 5/8 in. / 42 mm
	17	2 1/8 in. / 54 mm
Connection type	(blank)	Steel connectors
